## Summary

Java Developer with 3.8+ years of experience specializing in high-performance desktop applications and real-time distributed systems. Expertise includes 7 months of onsite integration support in the UK, bridging gaps between standalone modules and complex enterprise systems. Proficient in DDS for asynchronous communication, Spring Boot, and JVM tuning, with a proven track record of reducing application crashes by 40%.

## Work Experience

### Java Developer (Software Engineer)

Nov 2022 – Present

[ALTEN India](#) (formerly ALTEN Global Technologies Pvt Ltd), Bangalore

- Engineered and maintained 10+ scalable backend services using Java and Spring Boot, improving system reliability by 25%.
- Optimized and structured database schemas using JPA and Hibernate for MariaDB/MySQL, reducing query execution time by 30%.
- Deployed to the UK client site for 7 months to provide onsite integration support, successfully bridging the gap between standalone desktop modules and complex enterprise systems.
- Implemented asynchronous communication using DDS, enabling low-latency, real-time data exchange.
- Collaborated with UK-based client engineers to resolve complex integration issues and maintain 100% system compatibility.
- Diagnosed and resolved critical memory leaks using VisualVM, reducing application crashes by 40%.
- Analyzed heap dumps and tuned JVM performance, decreasing memory consumption by 20%.
- Created JavaFX-based UI modules, enhancing usability and reducing user interaction time by 15%.
- Executed unit and UI testing using JUnit, Mockito, and TestFX, increasing code coverage to 85% and reducing defects by 30%.
- Improved team productivity by 20% through effective Git-based version control and streamlined code integration.

## Projects

### Integrated Anti-Submarine Warfare Defence Suite (IADS)

- Architected and built a desktop application and automation testing framework using Java, JavaFX, and Spring Boot.
- Integrated persistence layer using JPA and Hibernate, improving data processing efficiency by 25%.
- Engineered a low-latency real-time system, reducing response time by 35% for mission-critical operations.

### Employee Engagement Platform (SkillMitra)

- Contributed to a microservices-based platform for managing employee training, certification, and engagement.
- Developed and integrated backend services using Spring Boot, enabling communication across multiple modules.
- Utilized Eureka for service discovery and implemented secure authentication mechanisms.

## Technical Skills

**Languages:** Java

**Backend:** Spring Boot, Spring Security

**Frontend/UI:** ReactJS, JavaFX

**Architecture:** Microservices, REST APIs, Client-Server

**Databases/ORM:** MySQL, MariaDB, JPA, Hibernate

**Testing:** JUnit, Mockito, TestFX

**Tools:** Git, Maven, Gradle, VisualVM, Jenkins

**Concepts:** Multithreading, Concurrency, JVM Internals, Design Patterns

**Cloud/DevOps:** Basic understanding of AWS, Docker, CI/CD Pipeline, Kubernetes

**Platforms:** Windows, Linux

**Other:** Confluence, Enterprise Architect(EA)

## Achievements & Leadership

- Semi-Finalist at TechGig Code Gladiator 2021, organized by TechGig and Cognizant.
- Participated in 3+ hackathons and company techathons, building innovative solutions to real-world challenges.
- Secured 1st place in company techathon for developing SkillMitra, a microservices-based platform.

## Education

**B.Tech in Computer Science and Engineering**

Bengal College of Engineering & Technology

CGPA: 8.65

2018 – 2022
